

# Rahul Sen Thakuri

## Full Stack Developer (Frontend-focused)

Email: rahul.sen@example.com | GitHub: [github.com/rahulthakuri](#) | LinkedIn: [linkedin.com/in/rahulthakuri](#)

### Profile Summary

A passionate Full Stack Developer specializing in building scalable and visually engaging web applications. I prioritize frontend development with strong expertise in React, TypeScript, and modern UI frameworks. With extensive knowledge of Java, I build robust backend services and APIs to support dynamic frontends. I enjoy working with cutting-edge technologies, maintaining clean code practices, and delivering responsive, user-focused solutions.

### Technical Skills

Frontend:	React, TypeScript, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+), Redux
Backend:	Java (Spring Boot), Node.js, Express.js
Databases:	PostgreSQL, MySQL, MongoDB
Tools & Frameworks:	Git, Docker, Vite, Webpack, REST APIs, JWT Authentication
Other:	Agile Methodology, Responsive Design, Problem Solving, UI/UX Collaboration

### Experience

Full Stack Developer — Freelance / Project-based

2023 – Present

- Developed multiple responsive full-stack web applications integrating RESTful APIs.
- Built user-centric interfaces using React, TypeScript, and Tailwind CSS.
- Implemented backend services using Java Spring Boot and Node.js.
- Focused on writing modular, reusable components and ensuring cross-browser compatibility.

### Highlighted Projects

Employee Management System — A Django + React-based web app with secure JWT authentication, session tracking, and payments API.

Portfolio Website — Personal website built with React, TypeScript, and Tailwind showcasing projects and skills.

Chess Engine Integration — Combined a Python Flask backend chess engine (Alpha-Beta pruning) with a React frontend for real-time gameplay.

### Education

Bachelor of Computer Engineering

Pokhara University, Nepal

Expected Graduation: 2025
